

UK ENERGY CRISIS – WILL THE NEW ENERGY BILL SOLVE IT?

LET'S MAKE SURE IT DOES!

The Energy Bill is going through Parliament now. As it stands, it will not ensure a safe, affordable and clean energy supply now or in the future. **BUT** we have time to make sure it's changed – here's how:

1. *Lower fuel bills – demand that the government make polluting companies pay carbon tax directly without passing the cost on to the consumer. Phase out costly gas, coal and oil.*
2. *Warmer homes – instead of letting the money raised from the carbon tax go into general government spending, use it to lift households out of fuel poverty by making them energy-efficient with good insulation and boilers.*
3. *Fulfill our obligation to de-carbonise our electricity supply by 2030 – no polluting fracking to extract shale gas trapped in rocks! Insist on stringent emissions performance standards for new and operating power stations.*
4. *Create jobs - support small companies and communities producing renewable energy and give them incentives to do it.*
5. *Insist on transparent government policy – no decision-making behind closed doors. No hidden subsidies to nuclear energy companies – nuclear energy is not 'renewable'.*
6. *The UK is currently a world leader in offshore wind and emerging wave and tidal energy – make sure it stays that way and that the government invests in these technologies.*

If you support lower fuel bills, warmer homes, and fewer carbon emissions, go to www.energybillrevolution and sign the petition. If you don't have a computer, go to the local library and explain what you want to do – someone will help you.

Check if your MP supports it – Roger Williams does. Thank your MP if they are supporting it, and ask them what they are doing to make sure the Bill is changed.

If your MP has not signed up yet to the [energybillrevolution](http://www.energybillrevolution), ask them why not, and tell them why you think they should.

Dear

I support the Energy Bill Revolution, and would like to know that you do too. If you have not already signed up to it, please do so at www.energybillrevolution.

If you have already signed up to it, thank you. Please let me know what you are doing to make sure the government listens to and fulfils the demands of this campaign.

I want the UK government to ensure safe clean and affordable energy supplies, now and in the future, and I believe that the Bill needs changing in order to enable this to happen.

Yours sincerely
